

MINIATURE ARC LAMPS.

These lamps work off the ordinary house current, and only require connecting to a lamp socket to be immediately ready for use. Especially convenient for use with the Biometer Camera-actograph.

THE RECORD.

Shows a special light. The carbon rods are placed in right angles and enclosed in a glass cylinder, thus only slightly and easily requiring holding down every time necessary.

open at top	42 10 4	42 10 4
open at side	42 10 4	42 10 4
open at bottom	42 10 4	42 10 4

Price, lamp, including mechanism, set in tin only. Biometer also, complete in wooden cabinet. Lamp only.

THE KILMAX.

The carbon rods are placed parallel. The carbon rods are placed in right angles and enclosed in a glass cylinder, thus only slightly and easily requiring holding down every time necessary.
